Introduction To **Rap Interiors**

We established RAP Office Contracts in 1988 and have been delivering a 'hands-on' personal experience since then to all our clients, ensuring that every project runs smoothly from concept to completion through constant dialogue, collaborating with the entire team, and providing advice every step of the way.

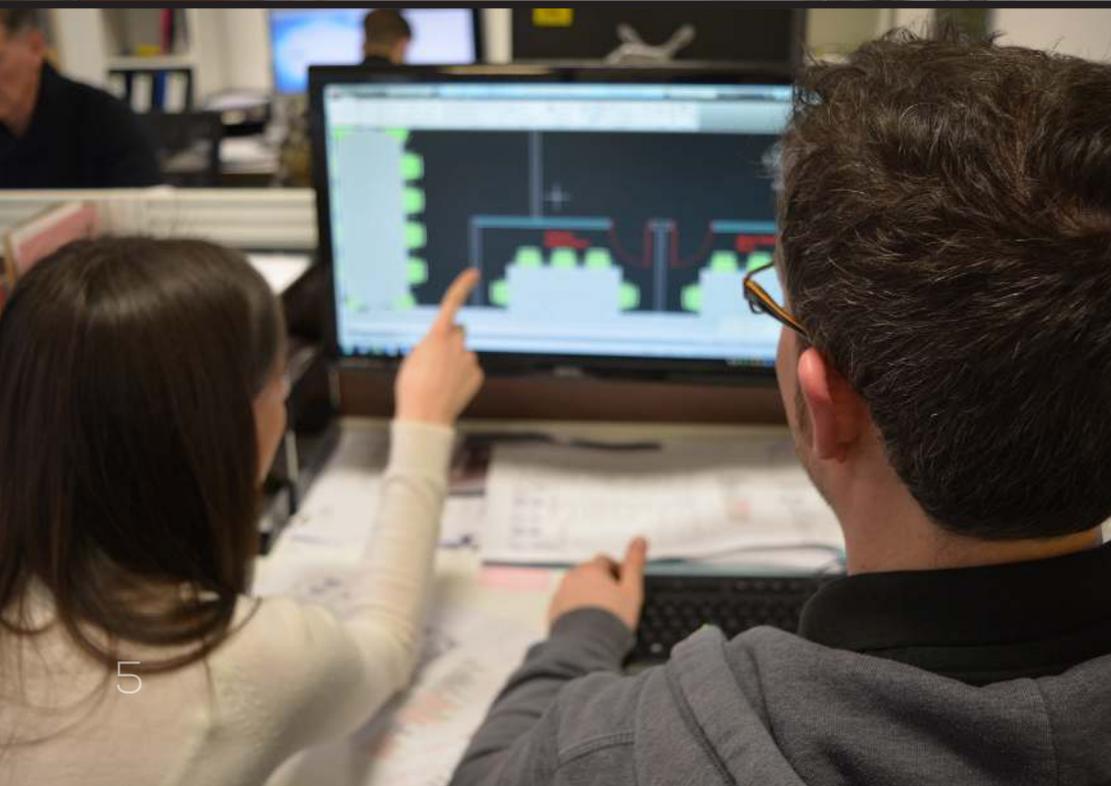

Rap Interiors was recently formed as a result of repeated requests from clients and professionals to compliment our amazing interior design approach with furniture supply and fit-out, to offer the ultimate turnkey solution.

“We work to achieve whole life value for every client with the lowest whole life cost - for every project.”

Our clients enjoy 1-2-1 focussed attention, with a single point of contact throughout the project; taking comfort in the knowledge that their contact has behind them the experienced and committed resource of the entire Rap Team.

From our offices in Kent, Brighton, Croydon and London, we design, supply, install, and hand over, stunning interiors across the UK.

As a successful family business with over 28 years' experience, we consistently demonstrate commitment to our clients, their professional teams, every project we start and finish, and – equally as important – our commitment to the development of the people that together form the Rap Team, who we consider to be **diamonds in this industry**.

Our Process & Approach

Visionary › By embracing your aspirations and adding the benefit of our unique design experience we bring your ideas to life by turning your thoughts into tangible, build-able, designs.

Efficient › We make the decision-making process easier by producing 3D and walk-through presentations each stage to make it simpler and more cost-effective to explore all options; ruling out costly mistakes earlier.

Experienced › Our team have over 28 years experience of ensuring that the finished product we deliver makes a valuable improvement to your business.

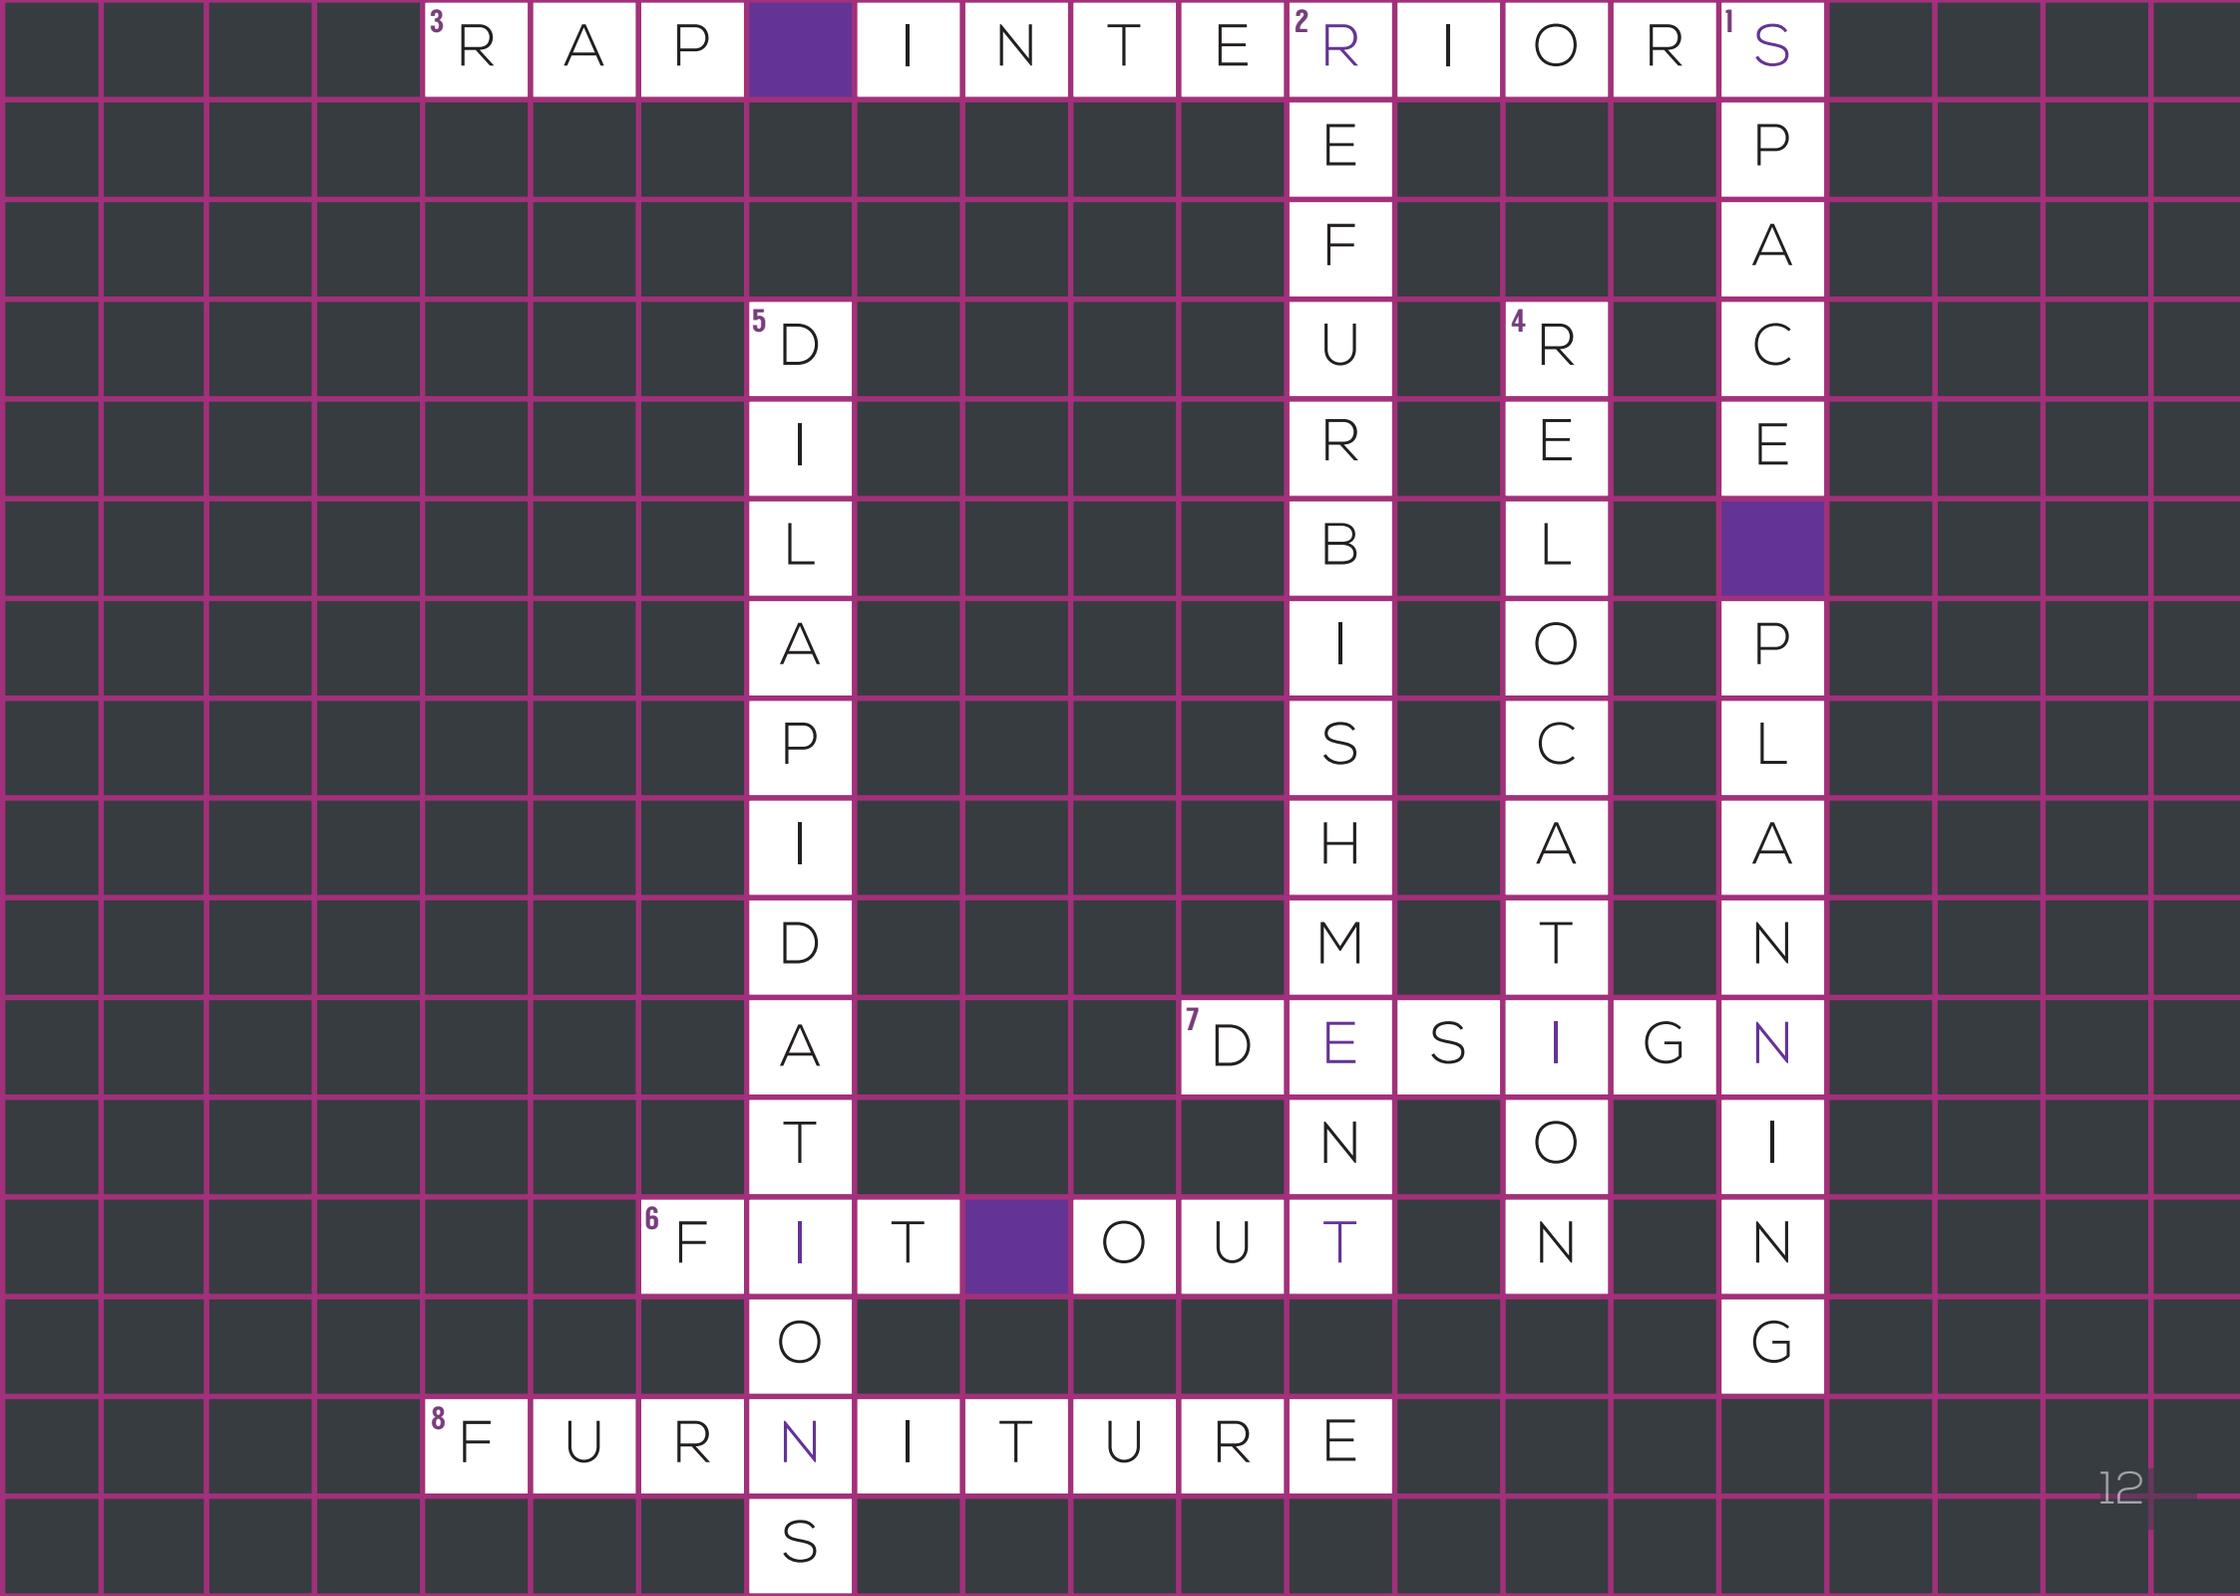

Considerate › We minimise any impact to your business by being fully prepared and highly reactive: we can turn around your project requirements within tight deadlines.

Cost Conscious › We maximise your budget by providing a flexible and experienced bespoke design service in-house as part of our fit out delivery offering, with our buying team working alongside them to constantly value engineer the project.

Dedicated › What you want is what we do, and you can rely on the entire Rap team to be as passionate about your project as you are.

Healthcare...

We appreciate the importance of the environment in a healthcare establishment, whether that's a surgery, dentist, hospital or care home.

Healthcare

At Rap Interiors we appreciate the **importance of the environment** in a healthcare establishment, whether that's a GP surgery, dentists, vets, hospital or care home. Let's face it, if your environment is fabulous, you're going to feel better!

As busy as you are, we believe that you need to be able to put in as little, or as much time as you like to your refurbishment. Regardless of the size of the project and how much you want to spend, we work to your schedule, and your budget, to **create an oasis of healing** for your patients.

Achieving amazing, **game changing results** is what we do and we understand that, whilst your healthcare facility needs to be practical, it can also look fun, fabulous and totally inspiring. At Rap Interiors, we take care of every aspect of your refurbishment, leaving you with plenty of time to get on with what you should be doing – helping people.

When it comes to the healthcare industry, our results speak for themselves. Whether we're supplying care home furniture or designing an optician's surgery, we work in harmony with **your ethos** to create the best possible outcome.

For truly exceptional results it can only be Rap Interiors.

Healthcare Space Planning

Making the most of space, making the most of your facility

Space planning for the healthcare sector involves taking all the disparate elements of your healthcare facility and ensuring that they fit together in a way that is **efficient, attractive and suitable** to your sector. In healthcare this can be more complex than in other sectors, as you not only have to consider things like headcount and the size of the property, but also the **special needs of your clientele** and the special equipment you may require.

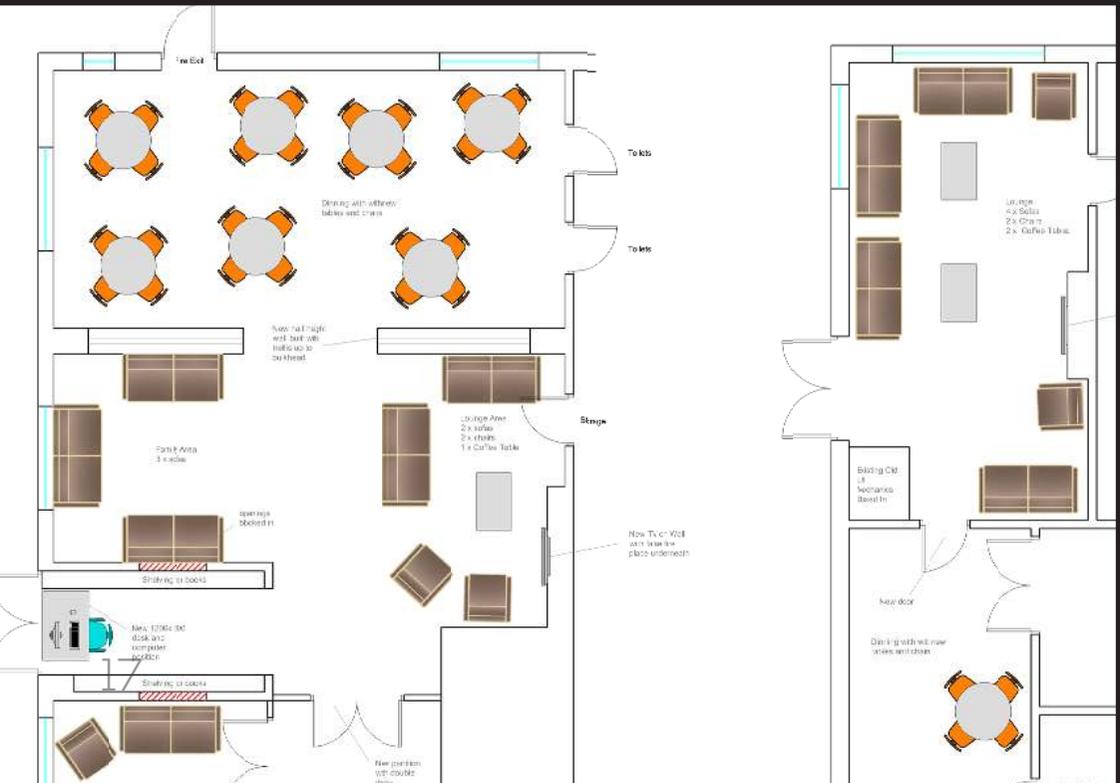

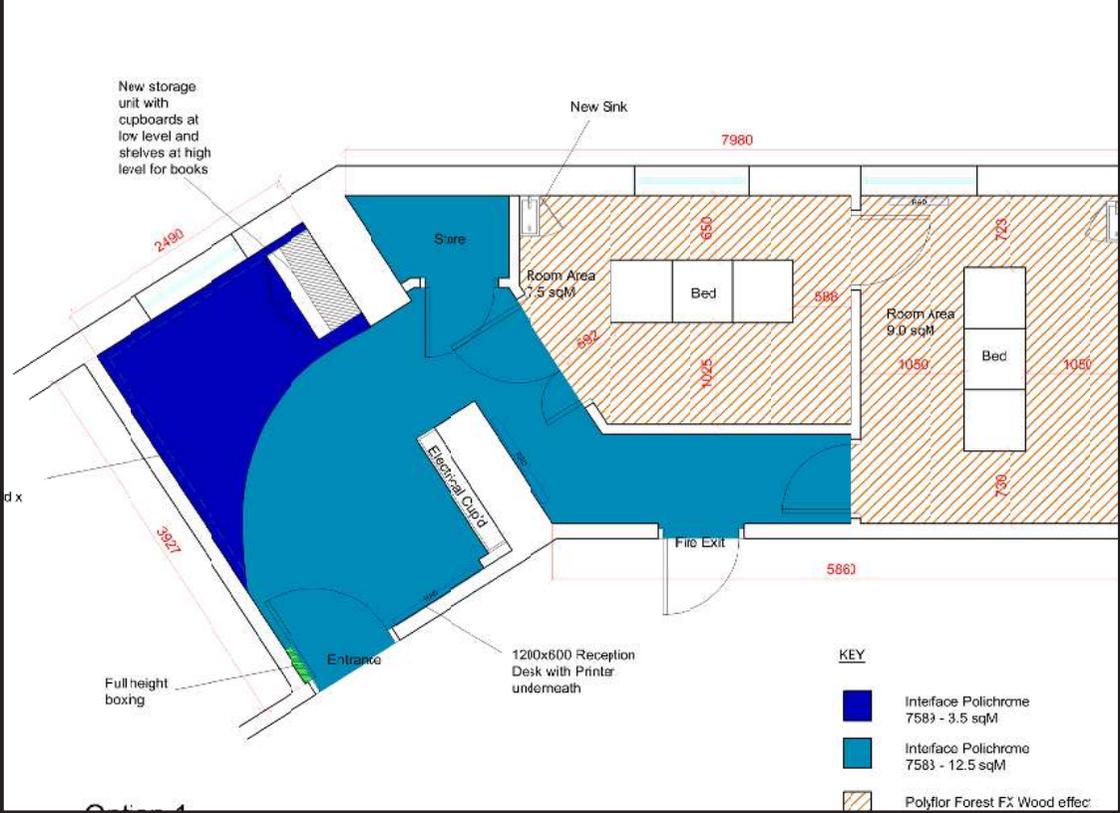

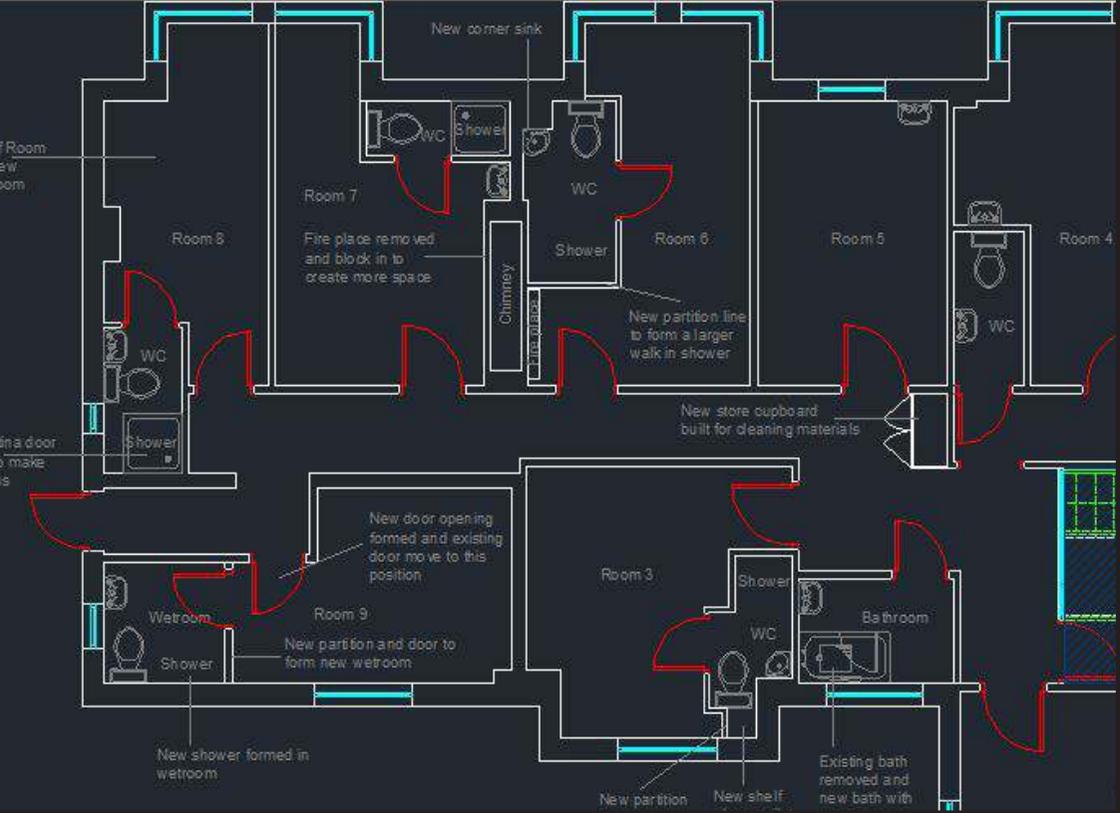

Here at Rap, we're experts when it comes to provide **space planning solutions** for health facilities including doctors' surgeries, health clinics, dentists and more, and we have specialised in residential and care home interiors throughout most of our thirty year history.

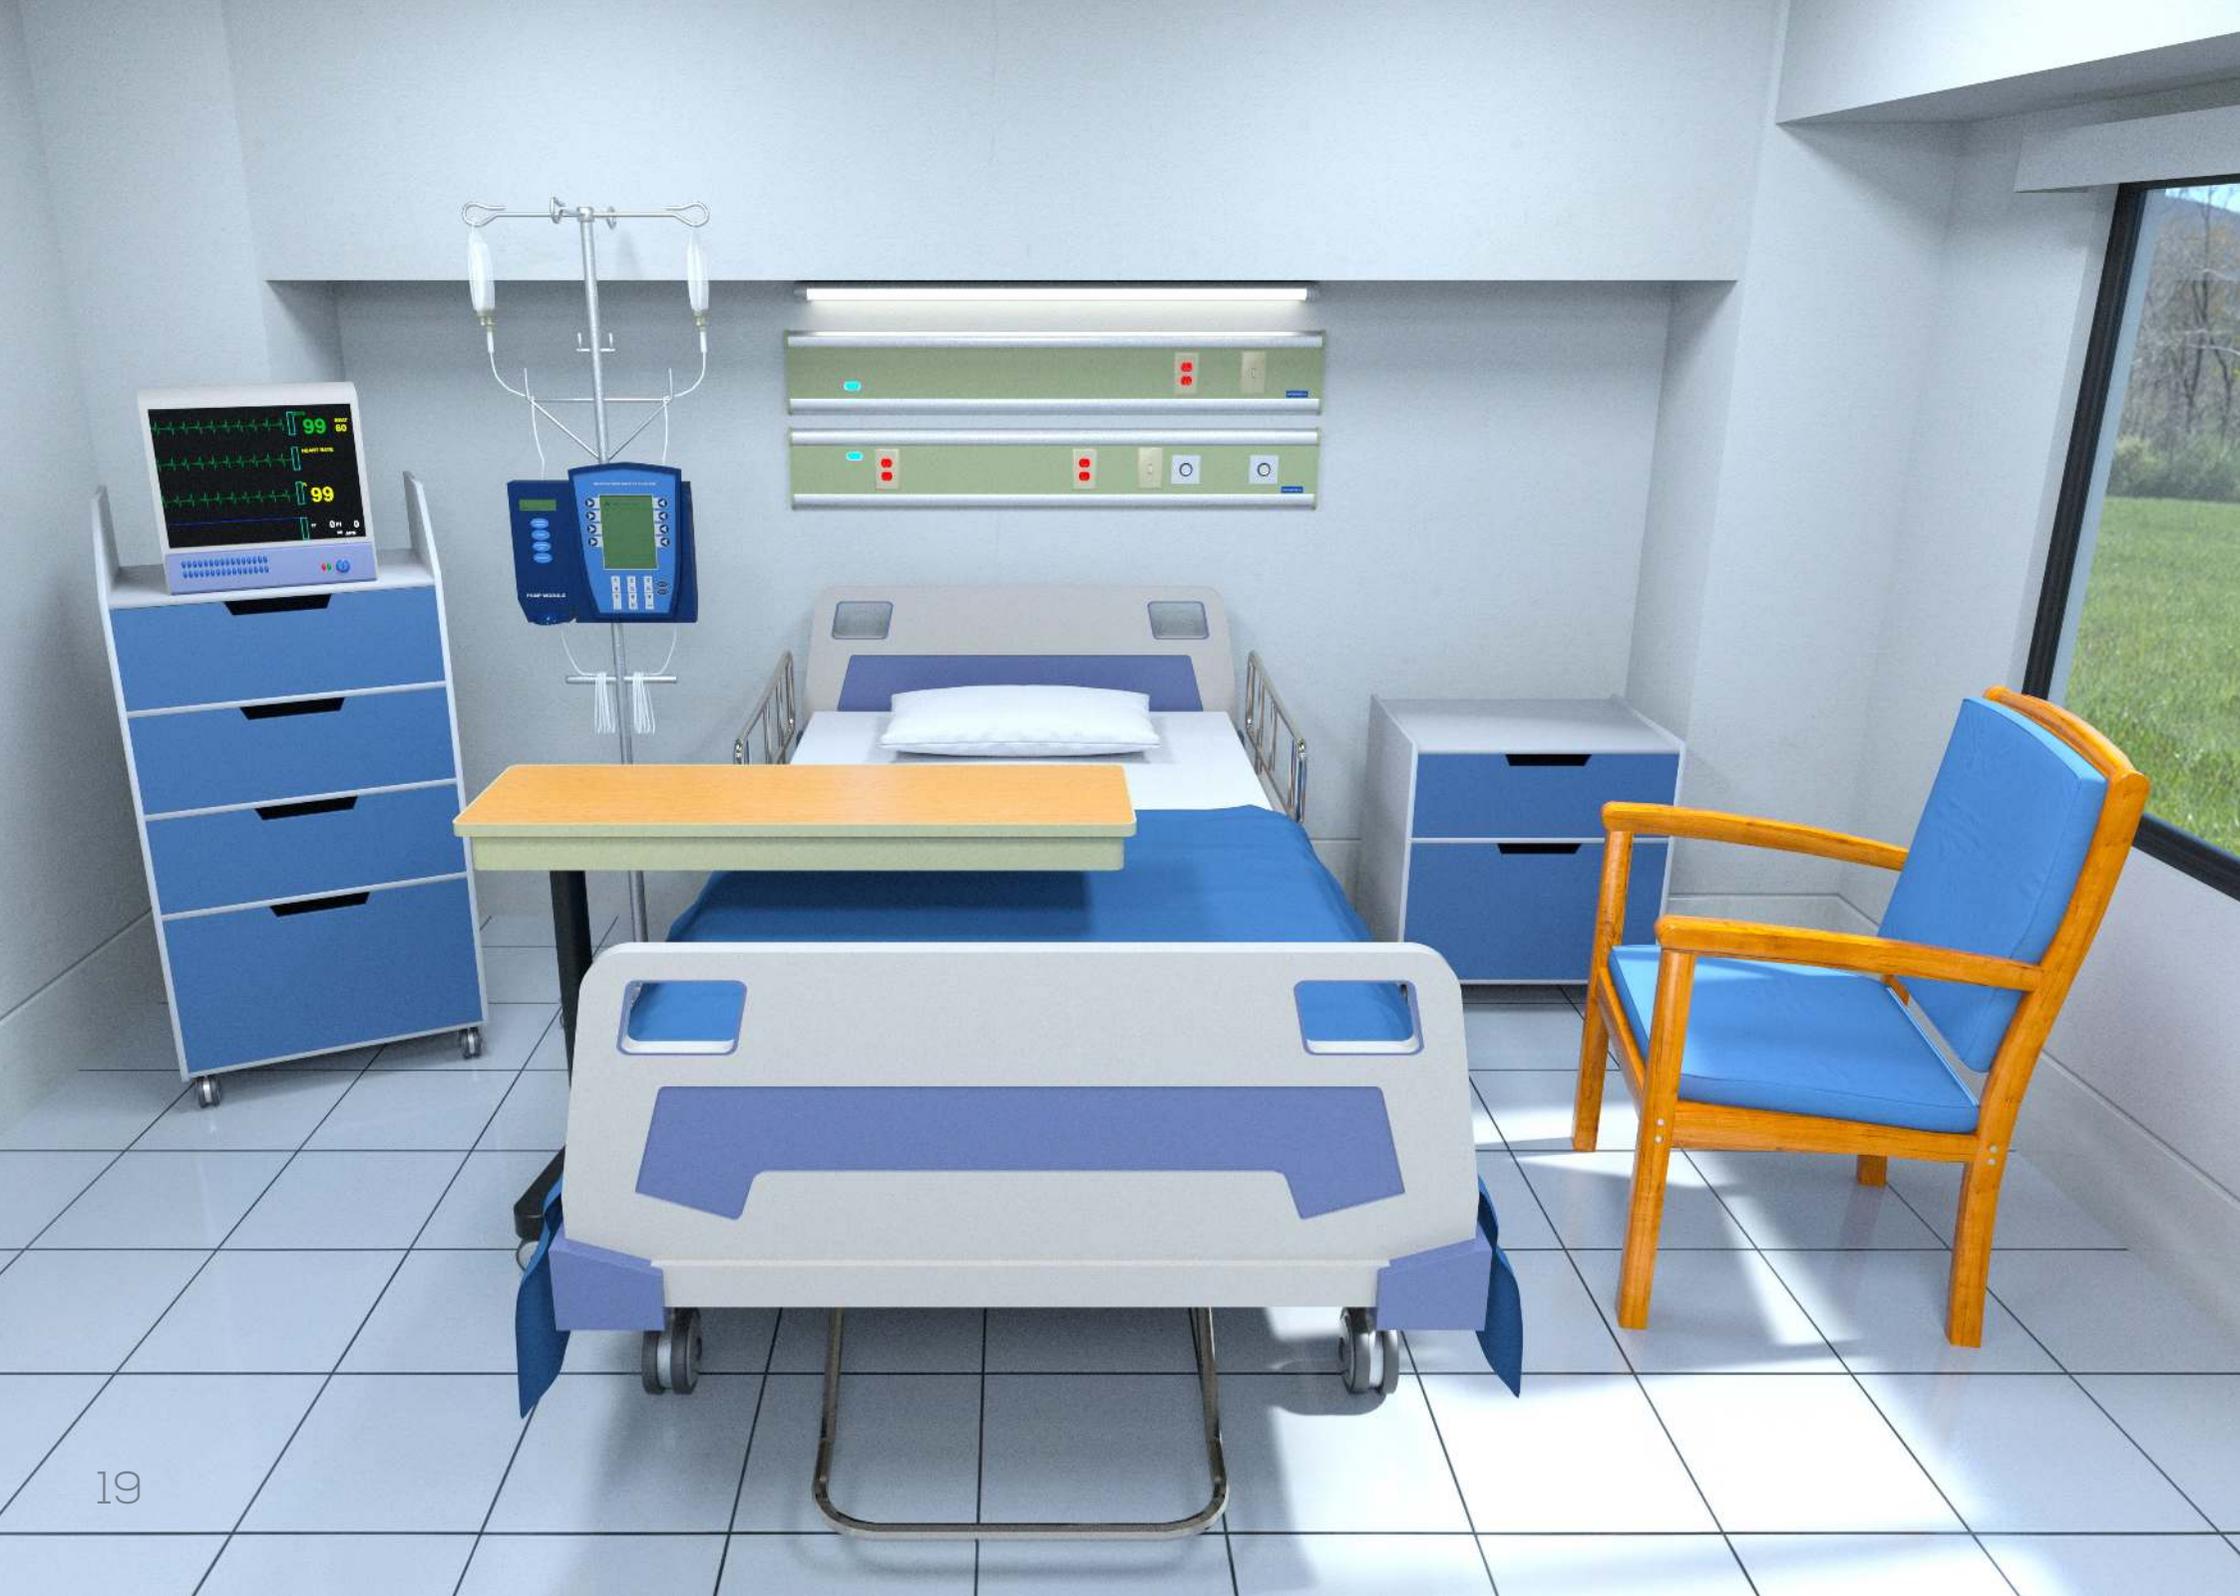

We understand that older properties may have a **character** all of their own and so we work in a **respectful and considered** manner to ensure that any new interior designs fits around the best aspects of your healthcare facility.

It may be that your care home residents have different levels of dependency and that therefore certain bedrooms need to be closer to a nurses' station. It may be that your dentists **specialise** in more than one area and require tools to suit multiple disciplines, or it may simply be that you need more room in one area of your surgery or care home.

Whatever the case, our **dedicated design team** will guide you seamlessly through the space planning process and advise you on every aspect of the project in order to facilitate an outcome that is time and cost effective, as well as **sympathetic** to the needs of you and your clientele.

For truly exceptional results it can only be Rap Interiors.

Healthcare Interior Design

Respectful, appropriate design for the healthcare industry

Although well known for our work in offices and other commercial properties, Rap are also experts when it comes to providing **unique**, sympathetic and appropriate designs for businesses in the healthcare industry, including care home interiors, hospitals, dentist and GP surgeries and more.

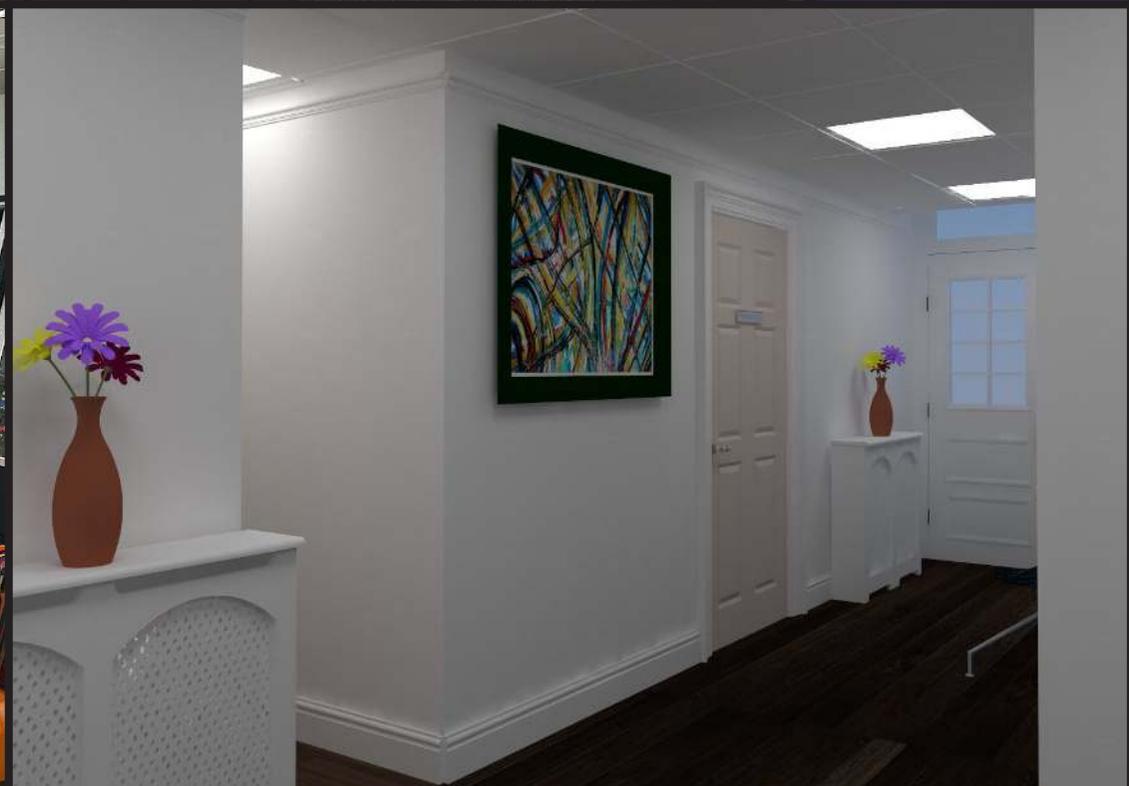

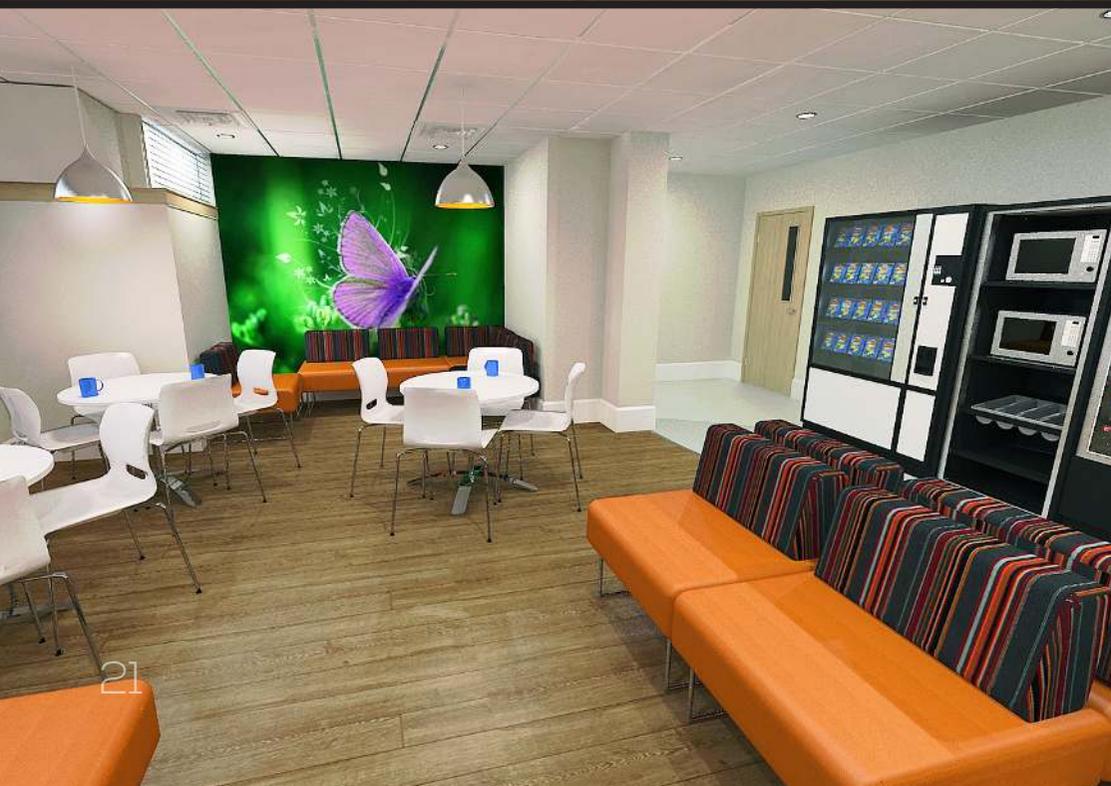

Our emphasis when approaching a healthcare facility is on being **respectful** to the clientele and **appropriate** to the service provided.

We work closely with staff, and take our lead from patients/residents in order to create interior designs that are conducive to **relaxation and recovery**.

Our process is organised, effective and straightforward, and our team of interior designers create first two, and then three dimensional designs that allow you to see **exactly** what the finished fit out or refurbishment project will look like, so that you can make any necessary design changes before the project even begins.

We understand that the care home and healthcare sector have **specific requirements** in terms of interior design and it's our job to meet these requirements in a professional and harmonic way. If your property has a **distinctive** character, we will aim to maintain this within the new design, whilst still bringing a **contemporary** and dynamic element to your healthcare interiors.

For truly exceptional results it can only be Rap Interiors.

Healthcare Refurbishment

A truly bespoke service

We have been assisting healthcare facilities in the implementation of **unique, innovative** interior design solutions since 1988, and our refurbishment services are second to none. We have worked on GP surgeries, dental practices, private clinics, veterinary practices and many other healthcare establishments, but in particular we have bundles of experience in care home refurbishments.

Our approach relies on an innate sense of **empathy** on the part of our designers and a **sympathetic and respectful** attitude on the part of our contractors. We feel that it is our duty to create an environment in which residents or patients can enjoy modern hygienic facilities, built to high specifications, without spoiling the **character** or ambience of the original property.

We understand the needs of your clientele and can provide additional services, or even specialist areas such as sensory rooms and wet rooms, so that you can provide the **highest levels of care** moving forward.

Your designated project manager will oversee every aspect of the refurbishment project and will guide you through our efficient, tried and tested process. From small projects to large, from old properties to new builds, we have the requisite **experience** to offer you an **outstanding** refurbishment service for your care home, dental surgery, doctors' surgery or other healthcare facility.

We take into account the age and status of your clientele, **your requirements** as healthcare staff and any and all current legislation regarding health & safety and standards within your profession. Our **careful approach** allows us to meet and exceed the expectations of our clients on every project.

For truly exceptional results it can only be Rap Interiors.

Healthcare Fit Out

Exceeding expectations for healthcare fit outs

Our approach to healthcare and care home fit out projects is one of **respect and empathy**, working with you to make your patients feel welcomed and your residents feel at home. You are in safe hands with Rap Interiors.

We feel that healthcare facilities should be **inspiring, relaxing and welcoming**, with innovative interior design and effective use of space. We work closely with staff, and listen to patients/residents in order to provide a service that is time efficient, cost effective and ultimately transformative.

Offering a **complete solution** for healthcare fit outs means you can rely completely on the team at Rap to keep you updated regularly with programme updates and regular on site meetings – if you so wish.

We offer a range of services in addition, or in conjunction with our fit out services, including air conditioning, alarm systems, wet rooms and sensory rooms, and our service is completely bespoke.

Since 1988, Rap have transformed numerous dental practises, doctors' surgeries, hospitals, veterinary waiting areas, care home interiors and more, helping to create **hygienic interiors** that have immensely benefitted them and their patients. We offer a start-to-finish service that gives you high spec, compliant fit outs that will 'make-over' your healthcare facility/property.

For truly exceptional results it can only be Rap Interiors.

The Mill
Clinic

Healthcare Furniture

Meeting your requirements with top quality furniture

High **quality, appropriate** furniture is essential in a healthcare facility, particularly one in which your patients or residents present with special needs.

Our design led, **first class range** of furniture for healthcare includes tables, chairs, beds, wardrobes, reception furniture and more, and come with additional features such as adjustable arms, grips and wings, waterproof and antibacterial finishes and durable frames, all designed specifically for people with physical disabilities and diminished motion ranges and so a perfect choice for care home furniture, for example.

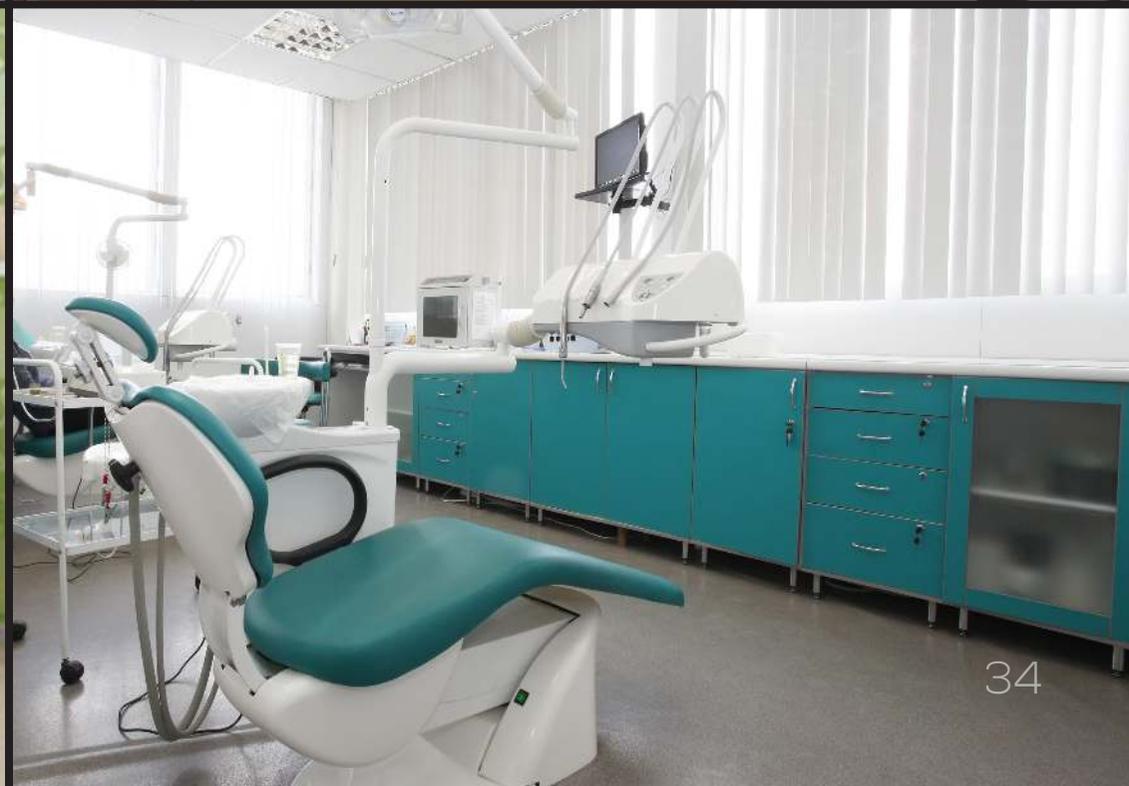

All our furniture meets British Safety Standards and is sourced from reputable, established companies who share our commitment to sustainability and service. We are a **registered and recognised** major supplier with **Carehome.co.uk** and are frequently called upon to provide our services and products around the country.

From water resistant furniture fabric finishes to wipeable faux leather – our commitment to your interior design, fit out or refurbishment project is focused on money being well spent.

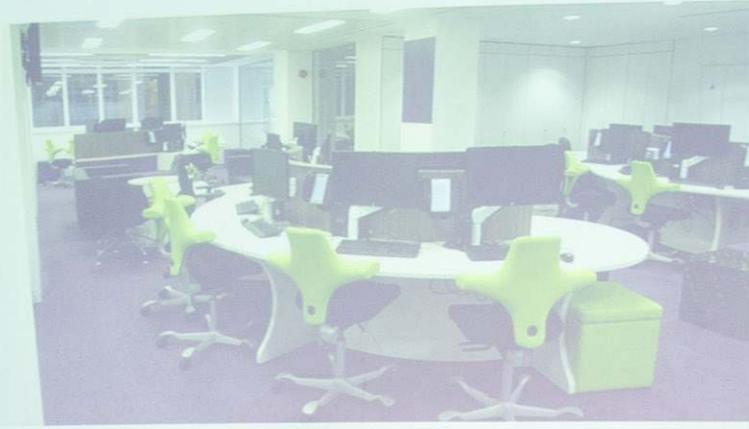

Our **extensive range** of furniture has been utilised by healthcare facilities from doctors' surgeries and dentists, to care homes and residential homes, and our clients across the UK give **consistently positive feedback** on both the furniture itself and the **quality** of the service we provide.

For truly exceptional results it can only be Rap Interiors.

Our Client Testimonials

"If you want a quality, professional complete fit out job done, and peace of mind, look no further than Rap Interiors.

I had no experience of building projects and was faced with the daunting task of turning a very basic new build shell unit into a high quality osteopathic clinic. Starting with detailed site research to prepare the quote, the team at Rap translated and coordinated my needs and desires into a practical, professional looking high quality finish clinic. They even sorted out the statutory regulation approvals for me.

Craig Carter (Rap Senior Projects Manager) was always calm, pragmatic, supportive and patient (with me)- especially during those few wobbly moments that occur during any building project. A hero always ready to help a "damsel in distress"! I put my trust (and money) into Rap Interiors and I have no regrets."

The Mill Clinic - Darent

"If any fellow Osteos out there are looking to upgrade their clinic or indeed any business premises holders for that matter, please look up Rap Interiors. They were so thorough, knowledgeable and professional and the workmanship is phenomenal. I would thoroughly recommend them to anyone. Please look through the project photos of my new practice to see what an amazing job they have done."

Lordswood Osteopath Clinic - Medway

“**S**ince 1986 when we bought the old nurses home in Marsham we have updated and improved this wonderful old Victorian building. The Charity provides offices for 30 community groups, and meeting rooms for another 250. We welcome a total of 30,000 volunteers and visitors a year.

When we decided to open a Cafe which would provide training placements for adults with learning disabilities we wanted to create a space that was visually stunning, exciting and inviting. We wanted our trainees to be proud and motivated, our visitors to linger and chat and our charity staff to choose The Cafe at Marsham Street as their favourite food-stop.

Rap Interiors went above and beyond to help us achieve this and we can't thank them enough for the amazing space they have created.”

Maidstone Community Support Centre - Kent

“**R**ap have completely transformed our Mind Wellbeing Centre, we couldn't be more pleased with the result.

They have been completely professional with every aspect of the refurbishment, having made working with them a great experience for us.

We are very proud of our new Wellbeing Centre, it is now a professional looking working space for our staff and volunteers, and a suitable, welcoming environment for all our clients.”

MIND - Maidstone

"We have sought the help and advice of Rap Interiors on a number of occasions including fit out and design and furnishing for a new build care home and extensive refurbishment of an existing home. Their responses have always been friendly, reliable and concise."

Abbeyfield Care Home - Gravesend

"We recently took over Victoria Cottage in Bedford and found it needed some serious TLC. We approached Rap Interiors to help redesign and space plan our 14 bed learning disabilities home and found them knowledgeable in helping us create a modern, friendly and comfortable living environment for our residents."

Victoria Cottage - Bedford

"I have used the services of Rap Interiors for the design and furnishing of my care homes. I have found them very professional. All the staff are friendly, polite, helpful and good listeners to customers requirements."

Abington Care Home - Northampton

"We have been very pleased with Rap Interiors and the services you have provided for the hospice. We would have no problem recommending them to any hospice "

Heart of Kent Hospice - Kent

"A superb job and we are very happy with the completed project"

The Knoll Hospice - Deal
